on the hogback.

**Response from Roxborough Water & Sanitation District Regarding Construction:** Director Ephram discussed with the Board the responses from Roxborough Water & Sanitation. It was noted a blowoff was installed on the northern end of the 24" waterline for flushing the main during testing. It was noted the plan is to discharge the water into the nearby storm inlets at the Village Circle East / West intersection or into the Willow Creek drainage area near the blowoff location so they will not need to discharge water onto the District's property again. All flushing discharges will be aerated to dechlorinate the water prior to discharge.

Director Ephram reported the restoration work for the staging area on the District's property will occur towards the end of October or early November once all the connections are completed. A walk through will be scheduled to determine the facilities (curb, gutter, concrete trail) damaged by the construction. The damage to the trail through the staging area prior to construction to facilitate the evaluation of construction damage was documented. Roxborough Water & Sanitation District discussed with John Juranek previously that the curb and gutter where trucks and equipment have entered the staging area will be replaced once American West no longer needs to access the staging area.

As part of the repaving of the northbound lanes, Roxborough Water & Sanitation District will be reviewing the curb and gutter with John Juranek to determine other areas that will be repaired in conjunction with the paving.

Director Rubic requested a remediation plan be provided.

**District Maintenance Responsibility:** The Board entered into discussion regarding the criteria for District maintenance responsibility, to include all areas that the District could be responsible for in the Request for Proposals ("RFP") for 2023 landscape and 2022-2023 snow removal services.
